

Between the pick-up or the tipper and the cab, an aluminium cabinet configured for various types of arrangements can be installed. This type of cabinet has as standard access doors on the left and right. Standard it is equipped with a half-height storage shelf.

The standard cabinet is painted in the non-metallic colour of the vehicle. The height and width of the cabinet correspond to the height and width of the cab. The standard depth is 800 mm, but can vary from 600-1400mm.

Optionally, we can offer you:

- Transparent roof
- LED lights
- Roller-shutter instead of a door
- Additional shelves
- Different dimensions
- Metallic colours
