

Double Cab (car without seats on second row)

Medium Van Double Cab is designed for the comfortable transport of 5 or 6 people, combined with a large separated loading space, making the vehicle ideal for families and entrepreneurs. The large cargo area can be well protected with multiplex, polypropylene or ABS panels to avoid damaging the bodywork. If weights and dimensions are correct, the car can also be homologated N1, with the accompanying taxation advantage.

Features included in the conversion:

- 3 individual seats on the second row, with head restraints and upholstered in accordance with the front seats. The stylized partition wall made of ABS material is equipped with a slightly colored glass and an integrated seat frame.
- Possibility of loading objects with a width of 1.24 m under the second seat row, up to the rear doors
- Standard equipment with three-point safety belts, according to European standards
- Folding armrests in option
- Ceiling upholstered with matching materials
- The windows behind the B-pillars can be fitted with a 35% dark foil, this film blocks the UV rays at 95% and the heat at 65%.

We can optionally place extra speakers in the separation-wall.

Loadin compartment

- Multitplex or sandwich PE anti-slip floor in option.
- The sides of the cargo compartment can be fitted with protection panels.
