

For out-of-pack sales or for well-defined sales (fi ice cream, waffles), we can transform a Medium Van into a sales vehicle.

The Medium Van Basic Vehicle:

- Car without partition-wall
- Sliding door on the left
- Single passenger seat.
- With low or high roof

The transformation:

- High roof from ACT if not original
- Right side sliding glass
- (standard dimensions 1700 x 950 mm)
- Side left side glass (optional) in the roof (dimensions 1000 x 200 mm)
- Windowsill on the outside
- Storage above the driver compartment

The sliding glass is fixed in a solid metal frame. This rigid metal frame is welded onto the body in order to maintain the original stiffness.

Options

- Ceiling at the inside of the roof
- Sales hatch instead of a sliding window (dimensions: 1700 x 950 mm)
- Work area with sink
- Stove
- Refrigerated display cabinet
- Additional batteries with inverter for refrigeration, light, computer etc.
